

EMILIE ALBEROLA

Emilie Alberola is Affiliate Professor at HEC Paris since September 2010. She holds a PhD in Economics from Paris I University in 2008, on the European Union Emissions Trading Scheme (EU ETS): organisation, market efficiency and carbon price drivers, and a Master's degree in Sustainable Development Management from HEC in 2004. She has published articles in leading refereed journals, including The Energy Journal, Energy Policy, International Economics, Journal of Policy Modeling etc. Emilie teaches Climate change Economics at HEC Paris and at Paris Dauphine University. She is also manager of the research unit on carbon and energies markets at CDC Climat, which is a subsidiary of French Public Bank Caisse des Dépôts dedicated to the fight against the climate change. Her research interests focus on the development of carbon prices and emissions trading schemes around the world and the implementation of policies on renewable energy and energy efficiency for power and industrial sectors. ADINA DABU

Adina Dabu received her Ph.D. in Human Resources and Industrial Relations from the University of Illinois at Urbana-Champaign. Her primary research interests are in the areas of entrepreneurship and the diffusion of management knowledge, strategic human resource management and the methodology of grounded theory and comparative analysis. Her current research explores the role of nascent consulting markets in the transnational diffusion of management practices. Her extensive fieldwork in this area draws on models of decision-making in early markets to reveal the micro-foundations of management practice diffusion and the role of institutional entrepreneurship activities in the build up of new institutional environments. Adina's theoretical agenda explores entrepreneurship frameworks such as effectuation theory and Austrian economics by emphasizing their understated, yet empirically important theoretic assumptions. In the field of strategic human resource management she has contributed to the

understanding of the role of human resources and human resource management in the generation of distinct types of economic rents. Her work has been published in Organization Science, Journal of Industrial Relations and Eastern European Economics. Click [here](#) for more details.

PANIKOS GEORGEALLIS

Panikos is a PhD candidate at the Department of Strategy and Business Policy of HEC Paris. His research interests revolve around sustainability issues and the interaction of social movements and organizations. He is currently studying the role of the environmental movement in the emergence of renewable energy technologies. He is also interested in innovation and the effects of firms' experience on their innovating patterns and performance in new industries. Prior to joining HEC he worked in a technology consulting firm and specialized in project delivery life-cycle. He holds a Master in Techno-Economic Systems and a diploma in Electrical and Computer Engineering from the National Technical University of Athens. Click [here](#) for more details.

JIULIN TENG (SUPPRIME)

Jiulin Teng is a PhD candidate in Strategy and Business Policy at HEC Paris. His research interest centres around the multidimensionality of institutions. He is into structural and dynamic models. He is also interested in decision theory with regards to institutions. Click [here](#) for more details.

MAURIZIO ZOLLO rajouter affiliate

[Prof. Maurizio Zollo](#) is visiting MIT Sloan from Bocconi University in Milan, Italy. He collaborated with neuroscientists at Vita-Salute San Raffaele University (Stefano Cappa and Nicola Canessa) and management faculty from ETH Zurich (Daniella Laureiro-Martinez and Stefano Brusoni), coauthoring papers on the topic, including “[An Ambidextrous Mind: An fMRI Study of Attentional Control, Exploration-Exploitation Decisions and Performance.](#)”
